

Garbolino

NEW COLLECTION

Welcome to the universe of the new Trout and Predator collection from Garbolino. The brand has always strived to make all fishing techniques easily accessible to as many people as possible, while also offering cutting-edge products to specialists.

This year is no exception with a large number of new products across all techniques and budgets. The most notable products will undoubtedly be the new series of ACTIVA nymph rods with their carbon handle, 7075 aeronautical-grade aluminum reel seat, and unparalleled balance in fishing action. For beginners in the nymphing technique (we also thought of them), an extension of our nymph ranges and setups will allow covering more fishing conditions throughout the season. We hope that the presented products will meet your expectations, and we wish you enjoyable moments by the rivers, lakes, and streams.

The Garbolino Trout and Predator Team

TROUT TELESCOPIC
